We offer a full national & international shipping and customs clearance service, arranged by our experienced administration team.

Horizontal Boring with GRUNDOMAT®

Grundomat pneumatic piercing tools have been providing accurate horizontal bores beneath roads, railways, and landscaping across the world for nearly 45 years. Water, gas, sewer and electrical industries have all benefited from this work horse of trenchless technology. Minimal operating space is required and the horizontal boring tool serves as a complement, and in many situations an economical alternative to, larger, more expensive directional drilling equipment.

GRUNDOMAT SOIL DISPLACEMENT HAMMERS – The pneumatically driven GRUNDOMAT ‘moles’ have been synonymous with accurate underground pipe-installations and representative of the trenchless ‘mole technology’.
