TGR26 TocDem 30 to 50 Tonne Demolition Selector Grab

The TocDem TGR26 360° Rotating Demolition & Scrap Recycling Hydraulic Selector Grab is designed specifically for 30 to 50 tonne excavators. We construct each grab using particularly wear-resistant steels, allowing it to efficiently demolish brick structures, timber, and other tough materials. Moreover, the robust build ensures consistent power, enabling fast and effective demolition operations.

Beyond demolition, our machine design maximises performance by enhancing material selection and streamlining the recycling and handling process. This dual-purpose approach not only boosts efficiency but also aligns with sustainable practices.

What We Offer at TocDem

- Huge 3 Year Warranty
- Hire to Buy Packages Available
- Trade-Ins Welcome
- Finance Arranged (subject to status)
- Comprehensive Service & Recalibration Support
- Heavy Duty Slew Ring

Why Choose TocDem Attachments?

At TocDem, we not only manufacture equipment but also offer dedicated service. We carry out rigorous pre-delivery inspections and testing on all TocDem Hydraulic Grabs to ensure consistent quality and performance. Moreover, we continuously invest in advanced technology and engineering practices to improve our product range.

In addition, we stand firmly behind every product we sell. That's why we maintain a full inventory of spare parts for our excavator grapples, ensuring immediate availability when needed. On top of that, our team provides expert technical guidance and support across the entire range of TEB Hydraulic Grabs.

**** Due to ongoing development, specifications may change at any time.**

Operate these tools only with trained, qualified personnel. Always complete a risk assessment and have a method statement in place before use. The operating excavator must include a cab with

demolition guards.
